Dear Wx Systems User,

as every year, we are delighted to write to you with information on our forthcoming Training Courses.

Basic WX1 Training Course

March 1st - 5th 2004, Switzerland

Duration: 5 working days

Course costs: 15000€, including tuition fee, 4-star hotel with full board

One week to learn how to use the "WX1 Procedure Designer" efficiently. The student will learn how to use databases to import and display them graphically on the screen, how the modular design of the WX1 assist the actual procedure design process, how to use all the powerful tools for vertical cut, ILS, CRM, RNAV etc. A part of the course is also dedicated to map projections and coordinate systems as well as noise plotting. After the course, the student will be able to make full use of his procedure design software tool in his daily operations.

Geodesy and Mapping for Procedure Designers

March 17th - 18th 2004, Copenhagen

Duration: 2 working days

Course cost: 3500€, including tuition fee, 4-star hotel with full board
2500€ for customers with a valid WX maintenance contract

In the days of computers, obstacle databases, digital terrain models, satellite navigation and digital maps, it is extremely important for procedure designers to understand geodetic and mapping issues. Importing WGS84 coordinates into a computer grid system and working on a background map that was created in a total different datum can lead to very dangerous errors. This course will make you understand what problems may occur and how you can address them.

Wx-Systems Refresher Training Course

April 5th - 9th, Switzerland

Duration: 5 working days

Course costs: 10000€, including tuition fee, 4-star hotel with full board
5000€ for customers with an valid WX maintenance contract

After applying a tool in daily operations for some time, one tends to forget how powerful the whole package actually is. It is quite normal that the procedure expert uses some functions more than others. The day he really needs the other functions he might have forgotten how it really works. As procedure design is a business where the correct use of a tool is safety relevant, the expert might waste some time reading the manual in order to remember the correct use of the function he is looking for.

The WX refresher course addresses that issue. As all participants are already experienced WX and ACAD users there is more time for practical exercises and for more sophisticated applications of the functions provided in WX1. 1 week to get you all brushed-up!

Conditions for Admission:

The student must prove his attendance to a basic PANS-OPS course, as well as an AutoCAD course held at an official Autodesk training centre of his choice.

Payment terms:

- Payment must be made in full 30 days prior to course commencement.
- Cancellations can be made free of charge up to 30 days before the course date.
- Cancellations made less than 30 days but at least 21 days before the course date will result in being charged 20% of the invoiced amount.
- Cancellations made less than 21 days but at least 14 days before the course date will result in being charged 50% of the invoiced amount.
- Cancellations made less than 14 days but at least 7 days before the course date will result in being charged 80% of the invoiced amount.
- Cancellations made less than 7 days before the course date will result in being charged the full amount PLUS an ADMINISTRATION FEE of 2000 €.

For countries required to have visa to enter Switzerland, the following rules apply:

Copies of the visa have to be faxed to the WX Systems head office 7 days prior to commencing the course AT THE VERY LATEST. Failure to do so automatically results in the cancellation of the whole agreement and the full course fee PLUS an ADMINISTRATION FEE of 2000 € being charged.

We think you will agree that the individual courses that are described in this document provide excellent opportunities for training for air navigation professionals, with specific cost advantages for registered Wx Systems users.

We hope that you will find a Course that suits your needs, and look forward to seeing you in the near future.

With kind regards

Yours sincerely
