February 7<sup>th</sup> 2003.

Dear Wx Systems User,

As every year, we are delighted to write to you with information on our forthcoming Training Courses.

Following over 8 years of successfully training more than 130 ICAO PANS OPS professionals, we decided that our academic programme required an overhaul. While wishing to ensure the highest standards to which our clients have become accustomed, we wanted to provide new and revised courses that are perhaps more relevant to the procedure designer in the coming years. Following discussions with many clients, we have decided to provide the following three modules of courses:

- **WX1 Procedure Designer Software Courses**
- **ICAO PANS OPS Courses**
- **Procedure Design Workshops and Master Classes**

We think you will agree that the individual courses that are described in the attached document provide excellent opportunities for training for air navigation professionals, with specific cost advantages for registered Wx Systems users.

All Wx Systems Training Courses are held at our location in Switzerland, but can take place on site at your organisation by prior arrangement.

We sincerely hope that you will find a Course, Workshop, or Master Class, that suits your needs, and look forward to seeing you in the near future.

With Regards,

Beat Zimmermann  
Training Director  
Wx Systems

Iben Andsager  
Client Service Manager
